Andy Gibran López Nambo

Modern Workplace, Cloud & Security Engineer · Microsoft 365, Intune and Entra ID

andy_gibran_2000@hotmail.com | Michoacán, Mexico (remote) | linkedin.com/in/agibranlopez | gibranlopez.com

Summary

Computer Systems Engineer specializing in cybersecurity. Over a year managing Microsoft 365, Intune, Entra ID and the security of 110 devices, from deployment to daily support, and remote IT consultant for a second company. I automate with PowerShell, document what I deliver, and I'm looking to join a consulting team working with Microsoft 365 and Azure.

Experience

IT and Cloud Solutions Consultant · JC Millwork — Jan 2026 – Present · Remote

- Migrated company email from Google Workspace to Microsoft 365.
- Automated payroll by integrating QuickBooks with a web application hosted on Vercel.
- Redesigned the company website and provide remote IT support and solutions.

Modern Workplace, Cloud & Security Engineer · Harinas Guadalupe — Aug 2025 – Oct 2026

- Cut new-device setup from about 2 days per PC to 10 PCs in 1 hour by standardizing 110 devices with Entra ID, Intune and Windows Autopilot.
- Standardized the configuration of the 110 devices with Intune policies: app deployment, hiding the C: drive, forced cloud saving, USB blocking, SharePoint sync, and Windows Hello biometrics only where required.
- Automated daily patching, software inventory and remediation for 110 devices with Action1 and PowerShell scripts, including BitLocker key recovery.
- Kept technical support running for 110 to 120 users and replaced traditional antivirus with CrowdStrike Falcon (EDR) on 105 devices.
- Eliminated a remote code execution (RCE) vulnerability and plaintext password exposure on Hikvision cameras by updating their firmware.
- Closed web vulnerabilities (including SQL injection) and migrated the corporate site to Astro with continuous deployment from GitHub and Cloudflare, lowering cost and improving availability.
- Classified information with Microsoft Purview and documented procedures and onboarding guides in GitHub.

Network and Cybersecurity Specialist (professional internship) · Alebat — 2023 – 2024

- Took part in implementing AWS security with CloudWatch, GuardDuty and WAF, and worked with S3, EC2, CloudFront and load balancers; applied ACLs and system hardening.

Project Analyst · TotalPlay — 2022

- Cut report and deliverable preparation for fiber-optic power tests from weeks to one day by designing the test tracing and report automation in VBA.

Technical skills

Microsoft 365	Microsoft 365, Entra ID, Intune (policies and app deployment), Windows Autopilot, Windows Hello, BitLocker, SharePoint, OneDrive, Outlook, Purview, Power Automate, Power Apps
Security	CrowdStrike Falcon (EDR), system hardening, Active Directory, ACLs, penetration testing (nmap, wfuzz)
Cloud	AWS (CloudWatch, GuardDuty, WAF, S3, EC2, CloudFront, load balancers), Google Cloud, Google Workspace, Cloudflare, Vercel
Automation	PowerShell, Python, VBA, n8n, Make, Action1
Virtualization	VMware ESXi, VMware Workstation, VirtualBox; Windows and Linux (Ubuntu) systems
Development	Astro, NestJS, Angular, Git and GitHub, QuickBooks integration

Achievements, education and certifications

First place in an internal CTF and OWASP challenge with KPMG (2023); used VMware ESXi to reach the virtual machines over a public IP.

B.Sc. in Computer Systems Engineering, cybersecurity specialization · Instituto Tecnológico de Morelia · 2018 – 2024 · Graduated
